Difference between Session Type Code And Service Code

Question: What is the difference between Session Type Code and Service Code?

The <u>Session Type code</u> is a number associated with the Session Type Description this in turn creates that picklist your clinicians would see when creating an individual or group note.

The <u>Service Code</u> is associated with the billing codes picklist which connects to a Transaction Type of Charge, Customer Payment, Discount, Write-Off, Collection-Out, Refund used by Billing. Your Biller would go to Setup -->Billing - Service to set up the service codes

Setup > Add, Edit or Delete Type Existing Session Types:	of Session
